HEARTLAND FOUNDATION SMALL GROUP VISION SESSIONS
MARCH 12-14, 2019
Greetings,

In March 2019, the Heartland Foundation Staff and Board Trustees held a series of Small Group Vision Sessions. Dr. Marilyn L. Grady, University of Nebraska-Lincoln was our process advisor and Dr. Ron Blumoff, MD, MBA, FASC, The Blumoff Group facilitated the sessions. Stakeholders from Mosaic Life Care, Heartland Foundation, St. Joseph, Missouri and the greater northwest Missouri region were invited to provide their input on strategic positioning for the Foundation.

Themes listed below emerged from the discussion:

- **Healthy Tomorrow**
  - Leadership Development
  - Early Childhood Education
- **Healthy Together**
  - Community Vitality
  - Missouri Western State University
  - Basic Needs
  - Workforce Development
- **Healthy Today**
  - Mental Health
  - Physical Health
  - Mosaic Life Care (MLC)/Heartland Foundation (HF) Relationship

This booklet is provided as an authentic collection of data shared by a variety of community voices, how that data relates to our current efforts and areas Heartland Foundation can explore for future enhanced partnerships in our community and the region we serve. Responses cultivated at our small group sessions are grouped with corresponding Buchanan County Population Health Data, Imagine St. Joseph 2040 vision plan information collected from our partners at Mosaic Life Care and the St. Joseph Chamber of Commerce and current Foundation programming.

We appreciate your investment in our mission and thank you for your belief in our vision. We are committed to championing education. Why? Because, the first 20 years of Heartland Foundation’s process confirms that to build healthy communities, we must empower people. To empower people, we must provide an open forum for conversation and act responsibly on the information shared.

Respectfully,

Julie

Leadership development was the most frequently noted topic across the fourteen group sessions Heartland Foundation hosted. As one participant noted, “Where is the next wave of community leaders coming from? Many who work here, do not live here.”

Several participants highlighted the limited opportunities for youth leadership. Only a few young people serve on student councils, in organizational leadership positions, or have the opportunity to participate in leadership development programs. “Young people have a drive to lead, but no outlet.” The mentoring of emerging leaders has the potential to cultivate community ownership for generations to come.

Ideas shared:
- Host a collaborative space for young leaders/future business opportunities.
- Youth informed community decision making.
- Leadership training for people entering the workforce.
- Cross-generational mentoring.
- MLC mentoring for PTO hours
- Career mentor matching for high school students.

“Where is the next wave of community leaders coming from? Many who work here, do not live here.”

Imagine 2040 Plan: Grow Prosperity

Our greatest return-on-investment comes from investing in our people. Growing prosperity is more than economic growth and personal incomes. It is also about the quality of local civic leadership that provides the foundation for collaboration, engagement and inclusiveness. If our community is to have a prosperous future, we must provide an atmosphere that encourages leadership in all confident sectors of our community.

### HEALTHY TOMORROW

- emPowerU Civic Engagement Immersions
- e2 High School Fellowship
- Jump Starters Grants, 358K since 2007
- Adulting 101, 2019 Pilot
If there is one topic that seemed to unify the view of many, it is early childhood education. Participants repeatedly noted that we must work to shape habits early.

“Little kids are trapped in the situation they have been handed, program opportunities may be their only opportunity.” We repeatedly heard the call to find ways to empower young people to become influencers.

Ideas shared:
- Families want things to do with their children, find ways to promote family time.
- Young people need mentors to foster a positive path.
- Childhood poverty is a long road, help children build the confidence to break the poverty cycle.

Imagine 2040 Plan:
Invest in People

St. Joseph realizes that ensuring all children have access to early learning activities is the key to a successful educational system. Working with businesses, educators and social service agencies, the community will adopt a program that offers all children an opportunity for early learning and discovery.

HEALTHY TOMORROW

- Summer STEAM Camps, grades 3-8
- Pathways to Early Childhood
- Elementary Rural Gifted Consortium
- Elementary Science Careers Day
- Robotics Immersion, grades 6-8
Heartland Foundation has a long tradition of embracing the notion that communities who win the talent game, win the workforce development game. The small group session feedback provided a reminder that we need to work to ensure opportunities for skill development that matches the job opportunities of our region. “Healthy communities require jobs that pay enough to sustain a household.”

Participants noted that regional universities are bringing in a steady stream of young people to the area. However, they also pointed out that all too often, we are unsuccessful at convincing post-secondary age young people to create a home for themselves in our region after completing their education or training.

“Healthy communities require jobs that pay enough to sustain a household.”

Ideas shared:
- Directly advocate for the opportunities in our regions including 139th Airlift, internships, union jobs and post-secondary education.
- Cultivate a get-to-know tour of St. Joseph for young professionals.
- Provide life skills training for youth and adults.

Imagine 2040 Plan:
Invest in People

Have our award-winning public and private schools focus on career-based skills, post-secondary preparation and alignment with current and future jobs. This program builds on the future approach of incorporating stackable credentials that begin in high school and continue through post-secondary education.

HEALTHY TOGETHER

- Think Ahead Works, Coworking space
- Think Ahead Works, Internship/Apprentice Program
- 2019 CollaborACTION Grant, Edge Factor Implementation
The reflections captured in relation to community vitality reflect the passion building across our region to foster a culture of community growth, not just sustain what we have.

Participants repeatedly noted that people are shopping for a place to live, not work. They emphasized the emerging reality that in many industries, people can work from anywhere. “We do not have a job issue, people are not choosing to live in our community.” Empowered communities create and implement solutions that fit their unique needs and capacities. “We are competing for families to move here.”

“We do not have a job issue, people are not choosing to live in our community.”

Ideas shared:
- Invest in community beautification.
- Support public schools.
- Host prescriptive, prevention focused educational programs in areas of need with mental health, physical health, relational/social emotional health.

Improve 2040 Plan: Create a Better Place

St. Joseph/Northwest Missouri has become a place that some residents want to stay, and others choose to move. St. Joseph has transformed itself by taking advantage of a growing need for skilled and high tech-workers. Showcase for small business startups, entertainment venues, expanding arts and cultural amenities enjoyed by residences and visitors alike.

Positive Disruptor: A new conference and meeting facility constructed to allow the community to pursue small conventions and association meetings.
## Community Vitality

### Healthy Together

- Big Muddy Mini Maker Faire
- Community Transformation Forums
- Scholarships, 1.8M since 1984
- Regional Grants, 15.5M since 1984
- Discounted Non-Profit Facility Rental Rate
Missouri Western State University brings a steady stream of young adults into the St. Joseph community each year. Small group participants, including current and past students of Missouri Western State University, offered insight into the important connection between post-secondary education, work force development, and community vitality.

“Missouri Western students feel separated from the community.” Healthy communities actively engage young people seeking innovative ways to retain youthful thinking. One participant noted this as an area growth as we seek to build healthy communities across the region, “Missouri Western students feel separated from the community”. Several participants noted the need to engage and retain MWSU students in the Northwest Missouri.

Ideas shared:
- Students feel separated from the community.
- Students need leadership development in the community.
- Create a destination community, a place where young people want to stay.
- Incoming students get to know St. Joseph, see what St. Joseph has to offer.

Imagine 2040 Plan: Invest in People

MWSU to focus on community involvement and engagement that will lead St. Joseph to be considered a “university town” by providing an environment that inspires innovation and attracts sought-after talent.
MISSOURI WESTERN STATE UNIVERSITY

POPULATION HEALTH DATA

Missouri Western is an open admissions institution and offers 119 undergraduate majors, 18 masters degrees and five graduate certificates. Nearly 99 percent of MWSU graduates participate in an internship, undergraduate research, service learning, study away or other applied learning experiences.

*Data courtesy of MWSU.

HEALTHY TOGETHER
Across Northwest Missouri, the impact of poverty can be felt in every community. Participants repeatedly noted that for many across our region, a lack of transportation is inhibiting good health habits, work habits, and appropriate access to healthcare.

Throughout the small group discussions, participants challenged us to look beyond meals, shelter, clothing and basic services. “Education is the way out. What are the barriers keeping our kids from focusing on education?” We heard the hard message of concerns with duplication of support services and donor fatigue. The discussions across every session centered around the need for collaboration, without agency competition.

“*What are the barriers keeping our kids from focusing on education?”*

**Ideas shared:**
- Pull resources together into a routine, centralized model so families know where to go when they need help.

**Imagine 2040 Plan:**
**Invest in People**

Our public, private and nonprofit sectors are recognized nationally for their success in collaboratively addressing poverty. Focus includes both generational poverty and situational poverty. Agencies work together on shared goals, shared metrics and shared accountability, resulting in our poverty rate being cut in half.

MENTAL HEALTH

It was evident throughout the small group sessions that mental wellness is a goal we must all work to improve throughout our region, state and nation. Participants noted the impact of family stress on young and old. “It’s insane what people are up against, and it looks frantic. If that is how their parents are, that’s the way things are going.” They expressed concern over the high number of children in need of pediatric mental health care. One participant noted, people are melting down, running and feeling stressed out all of the time.

“Frontline providers (educators, clergy, caregivers) feel unprepared to deal with mental health care demands.”

Groups often discussed crossover issues such as substance abuse and homelessness. “Frontline providers (educators, clergy, caregivers) feel unprepared to deal with mental health care demands. They feel isolated, trying to problem solve alone with very few service options.”

Ideas shared:
• Programming to teach coping skills from pre-k through adulthood.
• Frontline provider training and on-demand professional support.
• Equitable opportunity for family physical or play-based activities.

Imagine 2040 Plan: Invest in People

Working with our local health providers, the community will create an early intervention program for those individuals challenged with mental health issues and addiction. The program is designed to offer individuals and families support that leads to sufficiency and stability.

Positive disrupter: If the community receives a federal grant that provides the resources to implement a new model of addressing mental health and addiction needs in St. Joseph.

Healthcare is changing fast. Reimbursement rates, insurance and drug company battles, and the political landscape all contribute to the unpredictability within the healthcare industry. The unpredictable nature of healthcare can make it difficult for us to know how and what to do to create healthy communities.

Participants in the small group sessions advocated for the examination of social determinant of health regional data. They articulated the need to keep our eye on the specific factors impacting population health, and the utilization of population health data in strategic planning process that reflect organizational agility.

**Ideas shared:**
- Educate to prevent illness (vaccines).
- Foster an increase in people using the lifestyle infrastructure already in place (walking/bike trails).
- Bridge the gap between healthcare and education: some patients do not understand the post care instructions.

**Imagine 2040 Plan**

Mosaic Life Care is considered a top hospital in the country. Ensuring that Mosaic can attract and retain a quality workforce is a community priority. The community will work with Mosaic to identify issues related to educational programs, talent attraction, and quality of life amenities that serve to attract and retain the best and brightest in the medical profession.

### HEALTHY TODAY

- Project Fit, 41 school sites since 2000
- Mosaic Life Care Cancer Endowment
- Mosaic Life Care Children’s Endowment
- Heartland Health (West) Auxiliary Endowment
As partners to create healthy, vibrant communities, Mosaic Life Care and Heartland Foundation play an important role across the Northwest Missouri and Northeast Kansas region. As this partnership of over twenty years continues to evolve, small group participants offered several pieces of advice.

First, most Mosaic Life Care patients live in the Northwest Missouri region. Our neighbors, family members and closest friends are counting on Mosaic Life Care for exceptional healthcare. “Make sure our hospital has the best of the best- equipment, programs, serving all illnesses, etc. People can’t afford to go elsewhere.” This call for collaboration and continuity between Mosaic Life Care and Heartland Foundation was heard throughout the sessions.

“Make sure our hospital has the best of the best... People can’t afford to go elsewhere.”

Ideas shared:

- Board collaboration, cross-board representation.
- Connect back together - be on the same page.
- Coordinate programs across MLC/ HF, be efficient with resources.
- Stay focused on healthy communities.
- Coordinate MLC caregiver volunteers and mentors to support programs in the community and Foundation.
- Allocate money for direct healthcare.
- Be the fundraising arm.

Imagine 2040 Plan

Mosaic Life Care is considered a top hospital in the country. Ensuring that Mosaic can attract and retain a quality workforce is a community priority. The community will work with Mosaic to identify issues related to educational programs, talent attraction, and quality of life amenities that serve to attract and retain the best and brightest in the medical profession.
MLC and HF are committed to building healthy, thriving communities for generations to come. We believe in championing education and empowering people to live their best lives. When healthcare is needed, we are dedicated to ensuring exceptional healthcare is available, right here in our region.
ABOUT US

Mission
Champion education and empower people.

Vision
People inspired worldwide to build healthy and thriving communities.

Purpose
Heartland Foundation’s purpose is to share the beliefs that:

• Each of us is progress, each of us is potential, each of us is possibility.
• Youth and adults who are empowered to effect positive change can make a real difference in a community.
• A commitment to lifelong learning ensures each generation will carry our ever-evolving democracy forward.
